# OhioMATYC Distinguished Service Award

Think about your colleagues across the state and their involvement in mathematics. Is there someone who springs to mind when you think of service to mathematics education? Do you know someone who is involved in professional organizations relating to mathematics? Do you know someone who is actively involved in sharing ideas through presentations or publications? Do you know someone who works to promote mathematics and mathematics education at the local, state, and/or national level?

If someone comes to mind, please take a moment of your time and recognize his or her efforts by nominating that person for the OhioMATYC Distinguished Service Award. The award has been established to recognize professors who have contributed to mathematics education and is awarded bi-annually. Nominations are accepted in the spring of odd years and the award is presented at the spring OhioMATYC meeting.

**To be eligible for the award:**

1. The person must currently be a member of OhioMATYC.
2. The nominee must have at least five years of college-level teaching experience in mathematics or mathematically related courses.
3. Members of the executive committee are not eligible.
4. Previous award recipients are not eligible for nomination again until at least three other recipients have received the award.

**Guidelines for Nominations:**

The nominee should:

1. Have service to mathematics education locally and regionally and/or nationally.
2. Have been involved in professional presentations and publications related to mathematics education.
3. Have any other service or information not mentioned above such as awards, grants, other positions held, etc.

The short nomination form requires only a few minutes to complete. The executive committee will serve as the selection committee, and nominees will be asked to provide additional information to the selection committee about their service.

Please email your completed nomination to the OhioMATYC Awards Coordinator, Victoria Kruglov. Should you have any questions, please feel free to email Victoria at victoria.kruglov@sinclair.edu.

Ohio has many dedicated mathematics educators; please take a moment today and nominate someone you know who has provided distinguished service to mathematics education for the OhioMATYC Distinguished Service Award.

# OhioMATYC Service Nomination Form

Name of Nominee

Number of years of teaching experience

College courses taught
